### RULES

**AMENDED MOTION OF LANDESBANK BADEN-WÜRTTEMBERG, NEW YORK  
BRANCH, FOR RELIEF FROM AUTOMATIC STAY**

Landesbank Baden-Württemberg, New York Branch, as successor administrative and collateral agent (the “**First Lien Agent**”) for the first lien lenders (the “**First Lien Lenders**”) under the First Lien Credit Agreement,<sup>1</sup> by and through its undersigned counsel, files this amended motion (this “**Liftstay Motion**”)<sup>2</sup> requesting relief from the automatic stay in order to pursue its state court remedies against the Property. The First Lien Agent bases this Liftstay Motion on the §362 Information Sheet submitted herewith, the following Memorandum of Points and Authorities, the pleadings and papers on file in this case, the declaration of Andrew Manley (the “**Manley Declaration**”), dated as of July 9, 2010, the declaration of Randall A. Fine (the “**Fine Declaration**”), dated as of July 9, 2010, and the appraisal of Snyder Valuation (the “**Second Snyder Appraisal**”), dated as of June 24, 2010, and attached as Exhibit 2 of the Declaration of Keith Harper, to be filed with concurrently with this pleading, the declaration of Larry Bertsch (the “**Bertsch Declaration**”), and such argument as the Court may hear.<sup>3</sup>

<sup>1</sup> Capitalized terms not otherwise defined herein will have the definition ascribed to them in the Original Motion (as hereinafter defined).

<sup>2</sup> This Liftstay Motion amends and restates the First Lien Agent’s request for relief in *LBBW’s Motion for Relief from Automatic Stay* [Docket No. 300] filed on June 10, 2010, in this chapter 11 case (the “**Original Motion**”). Objections to the Original Motion were filed by (a) the above-captioned debtor (the “**Debtor**”) pursuant to the *Debtor’s Opposition to Landesbank Baden-Württemberg, New York Branch’s Motion for Relief from Automatic Stay* [Docket No. 336]; (b) NexBank, SSB, as successor administrative and collateral agent (“**NexBank**”) for the Second Lien Lenders and certain of the Second Lien Lenders (Five Mile Capital Pooling International, LLC; FMC Real Estate CDO 2005-1 Master Trust, Series C; Spectrum Investment Partners, L.P.; and Transamerica Life Insurance Company, together with NexBank, the “**Second Lien Group**”) pursuant to *Objection of NexBank, SSB and Certain Second Lien Lenders to LBBW’s Motion for Relief from Automatic Stay* [Docket No. 329]; and (c) The Huff Alternative Fund, L.P. and The Huff Alternative Parallel Fund, L.P. (collectively, “**Huff**” and Huff, together with the Debtor and the Second Lien Group, the “**Objecting Parties**”) pursuant to *Objection of Huff Alternative Fund, L.P. and The Huff Alternative Parallel Fund, L.P. to LBBW’s Motion for Relief From the Automatic Stay* [Docket No. 334].

<sup>3</sup> Because the Second Lien Group has not yet filed their plan, the First Lien Lenders have analyzed the content of their prior testimony and the term sheet filed with this court on June 9, 2010 [Docket No. 297-1]. The First Lien Lenders reserve all rights to supplement or amend this motion based on any revised term sheet or plan filed by the Second Lien Group.

**Memorandum of Points and Authorities**

***Preliminary Statement and Factual Background***

This Court observed at the opening of this chapter 11 case that state procedures would be more suitable for disposing of the Property than a bankruptcy court. The First Lien Lenders have always agreed, and dutifully pursued non judicial foreclosure and appointment of a receiver in Nevada state court. But foreclosure would have left the Second Lien Lenders and the Debtors' owners with no recovery. Those stakeholders never intended to permit a foreclosure without threatening and commencing litigation to extract unwarranted recoveries from the First Lien Lenders. The most obvious threat was to file bankruptcy to invoke the automatic stay, drain value from the First Lien Lenders' collateral, and threaten a cram down. Both the Debtor and Second Lien Lenders made such threats. These threats were realized when the Second Lien Agent sued the First Lien Lenders, asserting a preposterous claim for breach of the Intercreditor Agreement.

Faced with time consuming litigation, an all-but-certain bankruptcy, and the Second Lien Lenders' intention to disregard the Intercreditor Agreement, the First Lien Lenders elected to pursue a consensual debt restructuring with all significant stakeholders. The First Lien Lenders repeatedly postponed foreclosure to negotiate. Discussions lasted for months. The Second Lien Group was offered terms more favorable than those offered to LIRA, but they demanded even greater consideration.<sup>4</sup> They insisted upon a restructuring unreasonably slanted toward junior interests (much like their current term sheet). Unable to reach a deal with the next party down in the capital structure, the First Lien Lenders agreed to support the Debtor's sale of the Property to

<sup>4</sup> See 10-K of FX Real Estate and Entertainment, Inc. for the fiscal year ended December 31, 2009, at 9-15, attached as Exhibit B to the Trustee Motion [Docket No. 112-3] for a description of a proposed transaction among the Debtor, LIRA, and the Second Lien Group and the First Lien Lenders. The relevant portions of the 10-K outlining the terms of the proposed transaction are attached hereto as Exhibit A.

1 certain existing equity investors through a prepackaged bankruptcy. That proposed sale was  
 2 subject to a market test of whether the Property could generate a recovery for the legally and  
 3 contractually subordinated Second Lien Lenders. The Court determined that the minimum  
 4 proposed sale price for the Property—which LIRA required—would chill bidding.

5  
 6 As a result, the First Lien Lenders refused to support any other proposed sale unless  
 7 LIRA agreed: (i) to give up its right to a break-up fee and other bid protections; (ii) to  
 8 termination of the Lock-Up Agreement (thereby freeing the First Lien Lenders to negotiate with  
 9 all third parties); and (iii) that the First Lien Lenders could offer the Second Lien Lenders the  
 10 same deal that they had agreed to with LIRA. The Second Lien Group, though, has refused to  
 11 negotiate and continues to push forward a cram down plan which violates the Intercreditor  
 12 Agreement, a document the Second Lien Group repeatedly has breached and ignored.<sup>5</sup> These  
 13 chapter 11 cases promise only further litigation at the sole risk and expense of the First Lien  
 14 Lenders. State law foreclosure is the best path forward.

15  
 16 Grounds for lifting the automatic stay exist under sections 362(d)(1) and 362(d)(2) of the  
 17 Bankruptcy Code. The Property's continued decline in value justifies lifting the automatic stay  
 18 under Bankruptcy Code section 362(d)(1). There is little doubt that in the present economic  
 19 environment generally, and the Las Vegas real estate market particularly, the value of the First  
 20 Lien Lenders' collateral is declining and at serious risk of further decline. National, state, and  
 21 local economic conditions that dictate success at the Property, such as unemployment and retail  
 22 sales, are deteriorating. Numerous retailers have closed locations on "The Strip" in 2010, and  
 23 vacancy rates at the Property have increased significantly since June of 2009. Fine  
 24

25  
 26 <sup>5</sup> Predictably, the Second Lien Group moved this Court for an order delaying determination of their claims  
 27 for breach of the Intercreditor Agreement immediately after the Court granted their motion to terminate  
 28 exclusivity. The Second Lien Lenders recognize the weakness of their claims that the First Lien Lenders  
 breached the Intercreditor Agreement, and know that having those claims adjudicated would derail their  
 ability to pursue their plan.

1 Declaration, ¶ 16H and Bertsch Declaration, ¶¶ 7D, 12. City Center's opening has been a major  
 2 disappointment and has not increased traffic at the Property (and is unlikely to do so in the next  
 3 decade). Fine Declaration, ¶¶ 16D, 16G. The Property has generated declining revenues since  
 4 mid-2009 and there is substantial deferred maintenance that must be addressed in the near term.  
 5 Bertsch Declaration, ¶¶ 8, 9. The Debtor has manipulated the cash flows at the Property in an  
 6 attempt to hide the fact that they are decreasing, not increasing.<sup>6</sup>  
 7

8 The actual and threatened decline in value of their collateral entitles the First Lien  
 9 Lenders to adequate protection. Without an equity cushion or unencumbered property, the only  
 10 potential source of adequate protection is cash payments. But all rents already are the First Lien  
 11 Lenders' collateral and cannot serve as adequate protection payments. Even if they could, the  
 12 First Lien Lenders have not received any payments during this case from the Property (except for  
 13 legal fees), and turning over all cash the Property generates would not fully compensate the First  
 14 Lien Lenders for the Property's actual and threatened decline in the value. On this basis alone,  
 15 the stay must be lifted.  
 16

17 It also is undisputed that the Debtor has no equity in the Property. The First Lien Lenders  
 18 have submitted an appraisal which values the Property at \$183 million. *See* Second Snyder  
 19 Appraisal. The Debtor and Second Lien Group have testified that the Property's value is less  
 20 than the claims of the First Lien Lenders.<sup>7</sup> Under these circumstances, section 362(d)(2) of the  
 21 Bankruptcy Code requires that the stay be lifted if the Property is not necessary to an effective  
 22 reorganization. The Supreme Court defines an "effective reorganization" as one reasonably  
 23 likely to be consummated within a reasonable period of time.  
 24  
 25

26 <sup>6</sup> The Debtor generated projections based on cash flows at the Property for June 2010. But that month  
 27 includes a one time \$40,000 lease termination payment. Without that \$40,000, cash flow declined from the  
 prior month. Bertsch Declaration, ¶ 7B.

28 <sup>7</sup> Debtor has just filed amended schedules that value the Property at \$137.7 million.

1           The Debtor appears to have abandoned any effort to file its own plan, and the only “plan”  
 2           on the table is based on a term sheet filed by the Second Lien Group.<sup>8</sup> That “plan” is not fair and  
 3           equitable, discriminates unfairly, and does not satisfy any prong of Bankruptcy Code  
 4           section 1129(b)(2)(A). Longstanding Ninth Circuit authority requires lifting the automatic stay  
 5           where a proposed plan primarily benefits a junior creditor to the detriment of an undersecured  
 6           senior creditor, or where a plan deprives the senior creditor of future profits from its collateral.  
 7           If the Second Lien Group’s plan were feasible—which it likely isn’t—its “waterfall” would  
 8           allow the out-of-the-money Second Lien Group a 20% dividend on its new equity investment—  
 9           nearly 400% more than the interest rate payable on the First Lien Lenders’ restructured loan.  
 10          The Second Lien Group also will obtain the lion’s share of any appreciation in the Property’s  
 11          cash flow or value. So long as interest payments can be made, the Second Lien Group will  
 12          extract cash to repay their minimal equity investment on a senior basis, after which they will be  
 13          playing with “house money.” If the Property’s cash flow increases, then the Second Lien Group  
 14          keeps most of it. But if the Property’s value stagnates or declines, then they lose nothing more;  
 15          the First Lien Lenders bear all that downside risk. It is entirely plausible that the Second Lien  
 16          Group could recoup their entire new investment and earn substantial recoveries on their existing  
 17          debt—some of which they acquired at steep discounts—even if the First Lien Lenders are not  
 18          repaid. The potential profits that the Second Lien Group see in this litigation-driven investment  
 19          strategy are so considerable that they are willing to give away a portion of them to non-investing  
 20  
 21  
 22  
 23  
 24  
 25  
 26

27           <sup>8</sup> As of this writing, the Second Lien Group has submitted only a non-binding term sheet for a plan. Even a  
 28           fully committed plan based on that term sheet cannot be confirmed, a result the Court should reach now,  
           rather than after months of litigation.

1 stakeholders to buy the voting support needed for their plan. But applicable law prohibits such a  
2 plan. Foreclosure would be a faster and more appropriate path to deleverage the Property.<sup>9</sup>

3 Other confirmation defects are equally glaring. The indebtedness distributed to the First  
4 Lien Lenders would not provide them with the value of their collateral or the indubitable  
5 equivalent of their claims. That indebtedness would lack either reasonable amortization or  
6 interest payments (or both), contemplates an unreasonably long six to nine year term, is not  
7 supported by a standard “bad boy” guaranty and does not contain customary covenants. Manley  
8 Declaration, ¶14. Such indebtedness would not be worth anywhere near the value of the  
9 Property, which is unsurprising for a financing with a loan-to-value ratio that exceeds 90%.  
10 Payments at even the ridiculously low rate of 5.5% per year on the First Lien Lenders’ claims—  
11 which the Second Lien Lenders have underestimated by approximately \$11 million—also may  
12 not be feasible, especially if the First Lien Lenders elect to treat their entire claim as secured  
13 under Bankruptcy Code section 1111(b). Amortizing the loan at a lower rate requires an  
14 appreciation in the value of the Property over time that is highly unlikely. Manley Declaration,  
15 ¶44. The proposed plan also is structured as a sale of “equity,” but in reality is a sale of the  
16 Property that deprives the First Lien Lenders of their right to credit bid. Even if the structure  
17 were valid, it amounts to a sale of the equity in the Debtor without any proper marketing or  
18 auction process to establish the value of that equity.  
19  
20  
21

22 Other plan defects include the following:

- 23 (i) The proposed interest rate on the debt that the First Lien Lenders would receive is too  
24 low and does not adequately compensate them for the risks of default;

25  
26  
27  
28  
<sup>9</sup> The First Lien Lenders have in the past made a commitment to honor all claims of unsecured creditors other than subordinated creditors such as the Second Lien Lenders. The First Lien Lenders are willing to commit to pay or assume, or have assumed in any foreclosure, the liabilities they had previously indicated they would honor in this case (other than the Debtor’s professional fees).

- (ii) Repayment of the Second Lien Group's legal fees violates section 506(b) of the Bankruptcy Code;
- (iii) The plan fails the best interests of creditors test because it does not provide the First Lien Lenders with the liquidation value of their collateral;
- (iv) The plan provides *de minimis* "gifts" to otherwise out-of-the-money stakeholders to gerrymander an impaired accepting class;
- (v) The plan violates the absolute priority rule and cannot be justified under the "new value" corollary because the new money is unnecessary, insubstantial, and not reasonably equivalent to the value of the equity to be acquired;
- (vi) The plan has not been proposed in good faith;
- (vii) The votes of the Second Lien Group should be designated because they will be voting in the capacity of a self-dealing plan proponent rather than as a creditor; and
- (viii) The proposed plan cannot be confirmed unless and until it has been established that the Intercreditor Agreement is invalid.

The proposed plan does not preserve going concern value, save jobs, or otherwise increase the value available for distribution to stakeholders. Pursuit of confirmation will require the destruction of value and maintain the cloud of uncertainty over the Property that has frustrated meaningful leasing or development activity. All the plan does is divert value to out-of-the-money stakeholders.

Notwithstanding these obstacles, those out-of-the-money stakeholders insist that this case must continue at the sole expense and risk of the only in-the-money creditors. The First Lien Lenders hold an "all-asset" lien and, because they are undersecured, all value, in any form, must be distributed to them. Both the law and Intercreditor Agreement require that result. But the "plan" proponents hope that this Court will allow them to game the system. They hope that the Court will allow them to pursue a plan that would on its face honor the principle that all value must be distributed to the First Lien Lenders, but which in reality shortchanges them at the expense of under-water stakeholders. The basis of their so-called "reorganization" is for the

1 Second Lien Group to make a *de minimis* investment. In exchange for creating a razor-thin  
2 equity cushion, the Second Lien Group proposes to gain most of the future appreciation in the  
3 value of the Property and any profits, while the First Lien Lenders are forced to suffer all future  
4 risk of decline. Such a plan is unconfirmable because it shifts the risk of success to the senior  
5 secured lenders.

6  
7 As this Court astutely observed, the Second Lien Group is in essence angling for a  
8 lengthy “option” while the First Lien Lenders are the only parties who are “bleeding”.<sup>10</sup> The  
9 Second Lien Group’s plan is both without precedent and contrary to law. The First Lien  
10 Lenders’ cash collateral has been used to fund a process that has thus far been fruitless in  
11 generating any improved value for the estate and has produced instead a wave of litigation.  
12 Their collateral is decreasing in value and at risk of further decline. There is no business to  
13 reorganize, just value to allocate. Even if cram down were possible, it would still require that all  
14 value be allocated to the First Lien Lenders. There is nothing here to be saved for the  
15 out-of-the-money stakeholders. Value allocation for this Debtor and this Property is most  
16 appropriately handled in a state court foreclosure. Accordingly, the Court should lift the  
17 automatic stay.

18  
19  
20 **I. The Assertion That the First Lien Lenders “Voluntarily” Invoked This Court’s  
Jurisdiction Are False and Irrelevant**

21 The Objecting Parties assert that the First Lien Lenders “elected” not to foreclose and that  
22 they “voluntarily” invoked this Court’s jurisdiction. The Debtor, for instance, argues that the  
23 First Lien Lenders “chose to proceed under the Bankruptcy Code with the agreement of the  
24 Debtor and LIRA, to recognize the highest recovery on the First Lien Loan.”<sup>11</sup> The Debtor  
25 knows perfectly well the First Lien Lenders chose to pursue the LIRA deal and a prepackaged  
26

27 <sup>10</sup> June 11 Hr’g Tr. at 13-14.

28 <sup>11</sup> Debtor’s Opposition to Landesbank Baden-Württemberg, New York Branch’s Motion for Relief from  
Automatic Stay (“Debtor’s Lift Stay Opposition”) [Docket No. 336] at 5.

1 bankruptcy on a “lesser-of-two-evils” basis and that the Debtor had always threatened and  
 2 intended to file for bankruptcy rather than allow foreclosure. In any event, such arguments are  
 3 irrelevant. There is no statute or case law which supports the principle that a secured creditor  
 4 “waives” its rights to seek to lift the stay if it initially supports an orderly and controlled  
 5 chapter 11 process. Such arguments make even less sense where the secured creditor faced the  
 6 impending prospect of an involuntary or nonconsensual chapter 11 proceeding designed to cram  
 7 down that creditor.  
 8

9 **II. The Stay Must be Lifted Because the First Lien Lenders Cannot be Adequately**  
 10 **Protected Against Any Actual or Threatened Decline in Their Interest in the**  
 11 **Property**

12 Section 362(d)(1) of the Bankruptcy Code provides that:

13 “....the court shall grant relief from the stay....such as terminating,  
 14 annulling, modifying, or conditioning such stay....for cause, including  
 lack of adequate protection of an interest in property of such a party in  
 interest.”

15 The burden is on the party opposing a request for stay relief under section 362(d)(1) to prove the  
 16 absence of cause. 11 U.S.C. § 362(g)(2). That burden includes proving that a creditor’s interest  
 17 in the collateral is adequately protected.<sup>12</sup> *In re Sun Valley Ranches, Inc.*, 823 F.2d 1373, 1376  
 18 (9th Cir. 1987). The First Lien Lenders’ entitlement to adequate protection includes protection  
 19 against the mere threat that the Property’s value may decline. *See In re Delaney-Morin*,  
 20 304 B.R. 365, 370 n.3 (9th Cir. B.A.P. 2003) (stating that “[a] secured creditor lacks adequate  
 21  
 22  
 23  
 24  
 25

26 <sup>12</sup> The Objecting Parties suggest that the First Lien Lenders’ prior agreement to accept a more limited  
 27 package of adequate protection should stay them from pursuing their statutory right to adequate protection.  
 28 This argument ignores the fundamental distinction in the Bankruptcy Code between consensual and  
 non-consensual use of cash collateral, and the fact that the case which the First Lien Lenders were willing  
 to fund was of a fundamentally different character.

1 protection if there is a threat of a decline in the value of the property.”).<sup>13</sup> None of the Objecting  
 2 Parties can meet this burden. They cannot prove that the value of the property is not declining or  
 3 that there is sufficient cash available to protect the First Lien Lenders from any actual or  
 4 threatened decline in value. *Sun Valley*, 823 F.2d at 1374 (lifting of the stay is appropriate when  
 5 there is no showing that a secured creditor is “protected against the declining value of the  
 6 property”). The Second Snyder Appraisal shows a decline in value of \$12 million for the  
 7 Property over the period July 21, 2009, to June 21, 2010, from \$195 million to \$183 million.  
 8 Further, the Fine Declaration also establishes that there is a substantial likelihood that the value  
 9 of the Property has declined since the Petition Date and that it will continue to decline in the near  
 10 term. Based on Mr. Fine’s expert opinion, the most likely scenario is that the Property will have  
 11 declined by approximately \$5 million during the period from the Petition Date through the date  
 12 this motion is heard. Fine Declaration, ¶ 12. Mr. Fine also believes a decline in value thereafter  
 13 at an annual rate of approximately \$10-15 million is likely. Fine Declaration, ¶ 12. This actual  
 14  
 15  
 16  
 17

18 <sup>13</sup> See also *In re Rosen*, 208 B.R. 345, 356 (D.N.J. 1997) (noting that “[o]ne basis for cause may be where a  
 19 secured creditor lacks adequate protection because there is a threat the value of the property may decline.”);  
 20 *In re Sterling Development, Inc.*, 2009 WL 196250, \*3 (Bankr. D.N.M. 2009) (noting that “[a] creditor  
 21 seeking relief from the automatic stay for cause based on a lack of adequate protection must demonstrate  
 22 that its collateral is declining in value, or that there is a threat of a decline in value, in order to establish a  
 23 prima facie case.”); *In re Balco Equities Ltd., Inc.*, 312 B.R. 734, 751 (Bankr. S.D.N.Y. 2004) (stating that  
 24 a secured creditor must “prove [the] decline in value—or threat of a decline—in order to establish a prima  
 25 facie case. Once the movant satisfies this initial burden, the burden shifts to the debtor to go forward with  
 26 evidence, and ultimately, prove that the collateral is not declining in value . . .”) (citing *In re Elmira Litho,*  
 27 *Inc.*, 174 B.R. 892, 902) (Bankr. S.D.N.Y. 1994)); *In re Worldcom, Inc.*, 2003 WL 22025051, \*6 (Bankr.  
 28 S.D.N.Y. 2003) (noting that “[a]s part of the prima facie case, secured creditors must prove a decline in  
 value — or a threat of a decline — during the term of the automatic stay. A secured creditor can prove this  
 decline in value — or the threat of a decline — by either quantitative or qualitative methods.”) (internal  
 citations omitted); *In re Pinto*, 191 B.R. 610, 612 (Bankr. D.N.J. 1996) (stating that “[a] secured creditor  
 lacks adequate protection if there is a threat that the value of the property may decline.”) (citing *In re Jones*,  
 189 Bankr. 13, 15 (Bankr. E.D.Okl. 1995); *In the Matter of Holly’s, Inc.*, 140 B.R. 643, 696 (Bankr.  
 W.D.M.I. 1992) (noting that “[secured creditor] is entitled to be protected or compensated with regard to  
 any diminution of property interest occasioned by the automatic stay. Failure to protect [secured creditor],  
 or compensate [secured creditor], for possible diminution of its property rights constitutes a lack of  
 adequate protection and expressly requires modification of the automatic stay.”) (internal citations  
 omitted).

1 and threatened decline is related to the continued recession and poor performance of the national,  
 2 state, and local economies. Fine Declaration, ¶ 16. This amount of the decline exceeds any cash  
 3 available to the estate to make adequate protection payments to the First Lien Lenders. In fact,  
 4 available cash generated from the Petition Date is only a small fraction of the \$5 million  
 5 probable decline in the Property's value. The Debtor's own budget, filed at the beginning of this  
 6 case, suggested that available cash would amount to \$1.89 million over the much longer period  
 7 of April 20 to August 11 (and in fact this number probably overestimates free cash due to the  
 8 unanticipated levels of litigation in this case).<sup>14</sup> The Debtor likely could fall short in future  
 9 months as well. The Debtor estimates it will have annualized net operating income of  
 10 \$9.3-9.5 million post-bankruptcy. This is less than the annual predicted decline in value even  
 11 before considering chapter 11 expenses.  
 12

13  
 14 In any event, the Debtor's cash is *not* available for adequate protection payments. The  
 15 "law in this Circuit is clear that when a creditor is secured by income producing property, when  
 16 its lien extends to the rents or other income generated by the property, and when the value of the  
 17 real property alone is less than the amount of the claim, then the amount of the secured claim  
 18 pursuant to § 506(a) includes both the value of the real property and the amount of the  
 19 accumulated cash collateral." *In re Arden Properties, Inc.*, 248 B.R. 164, 168 (Bankr. D. Ariz.  
 20 2000, citing *In re Ambanc La Mesa Ltd. P'ship*, 115 F.3d 650 (9th Cir. 1997) (holding that  
 21 unapplied post-petition rents of \$300,000 increased undersecured creditor's claim by that  
 22 amount, from \$4.3 million to \$4.6 million). Accordingly, the Debtor's free cash flow does *not*  
 23 provide a source of adequate protection because it must be paid or reserved for the benefit of the  
 24  
 25  
 26

27 <sup>14</sup> See Debtor's Operating Budget attached as Exhibit 1 to the Amended Interim Order Pursuant to 11 U.S.C.  
 28 §§ 105, 361, 362 and 363 and Fed. R. Bankr. P. 2002, 4001 and 9014 (I) Authorizing the Debtors to Use  
 Cash Collateral and (II) Granting Adequate Protection [Docket No. 83].

1 First Lien Lenders on a dollar-for-dollar basis. Every dollar the Debtor generates represents an  
 2 increased allowed secured claim of one dollar, meaning profits are not available as adequate  
 3 protection. Because its collateral is deteriorating in value at a rate greater than can be offset by  
 4 available adequate protection payments, the automatic stay must be lifted.

5 The Debtor argues that the value of the Property is not declining because there have been  
 6 marginal improvements to cash flow since the petition date. This assertion is of questionable  
 7 veracity and appears to be based on misleading figures and improper accounting practices rather  
 8 than improved performance. The alleged improvement is illusory, generated by mathematical  
 9 errors and the improper annualization of a lease termination payment in June.<sup>15</sup> Bertsch  
 10 Declaration, ¶ 7. Nonetheless, such income represents only part of the value of the Property.  
 11 The primary driver of value is the Property's potential future use as a site for a casino-hotel  
 12 development. The value of the First Lien Lender's collateral is not merely a function of phantom  
 13 improvements in rental income, but of the downward trending market for casino-hotel property  
 14 in Las Vegas. Fine Declaration, ¶¶ 16A-D. The actual and potential decline in these markets  
 15 exposes the First Lien Lenders' collateral to unreasonable and uncompensated levels of risk  
 16 while this case continues. For this reason, the stay must be lifted.

17 For the same reason, the Debtor's focus on the protection of rents is misplaced. The First  
 18 Lien Lenders do not contest that rents applied to productive maintenance benefit the Property, as  
 19 do payments of rent which produce replacement property. *In re Las Vegas Monorail Co.*, 2010  
 20 WL 1688811 (Bankr. D. Nev. 2010). But diverting cash collateral to pay professional fees and  
 21 other chapter 11 expenses does not protect or compensate the First Lien Lenders, especially in a  
 22  
 23  
 24  
 25  
 26

27 <sup>15</sup> See Bertsch Declaration, ¶¶ 7A-B, detailing the \$40,000 termination payment which the debtor has used to  
 28 claim \$480,000 in annualized revenues that will never materialize, as well as the understatement of  
 prepetition revenues.

1 case that has nothing to do with preserving the value of the Property and everything to do with  
 2 reallocating value to out-of-the-money stakeholders. The Second Lien Group should pay the  
 3 professional expenses and other costs of the chapter 11 proceeding because the case is being run  
 4 for its benefit. If the Second Lien Group does not fund this case (with any loan to the Debtor  
 5 junior to the First Lien Lenders' claims), then the First Lien Lenders are being deprived of rents  
 6 to which they otherwise would be entitled. If they could foreclose now, then the First Lien  
 7 Lenders would realize the full value of their collateral (including future rents). If forced to wait,  
 8 they will receive the value of their collateral *less* the amount of any chapter 11 expenses.

10 The Objecting Parties have the burden of proving that there is no decline or risk of  
 11 decline in value of the Property during this chapter 11 case. *Sun Valley Ranches*, 823 F.2d at  
 12 1376. This will be an all but impossible burden to meet because it requires proof that the Las  
 13 Vegas real estate and gaming markets are significantly less distressed and unstable than experts  
 14 believe. Fine Declaration, ¶ 15. Thirty thousand Las Vegas hotel rooms are vacant each night  
 15 and six vacant sites are available for development on the Strip (and five more may become  
 16 vacant). Fine Declaration, ¶¶ 16A, 16C. The economics of the market no longer support "green  
 17 field" development and, even if they did, five of the vacant sites are larger and easier to develop  
 18 than the Property. Fine Declaration, ¶¶ 16B, 16D. Similarly, there is no objective evidence that  
 19 the precipitous decline in value of this Property over the past two years has all of a sudden  
 20 halted. In short, to avoid lifting of the stay, the Objecting Parties must not only "call" the bottom  
 21 of the market but must prove it to this Court. Given the Objecting Parties' evidentiary burden,  
 22 any doubts on this issue must be resolved in favor of the First Lien Lenders.

1           **III. The Stay Must be Lifted Because the Collateral of the First Lien Lenders Is Not**  
 2           **Necessary For An “Effective Reorganization”**

3           Section 362(d)(2) of the Bankruptcy Code provides that the Court must grant relief from  
 4           the automatic stay with respect to any property in which “the debtor does not have any equity” if  
 5           “such property is not necessary to an effective reorganization.” Section 362(g)(1) of the  
 6           Bankruptcy Code imposes on the First Lien Lenders the burden of establishing that there is no  
 7           equity in the Property. Not only does the Second Snyder Appraisal satisfy this burden, but every  
 8           party in interest in this case concedes that the value of the Property is less than the First Lien  
 9           Lenders’ debt. *See* Debtor’s Lift Stay Opposition at 9; Huff’s Motion for Appointment of a  
 10          Chapter 11 Trustee [Docket No. 112] at 5; June 11 Hr’g Tr. at 72.

11          The burden on all other issues is on the party opposing a lift stay motion. 11 U.S.C.  
 12          § 362(g)(2). The Supreme Court has stated that to meet this burden, an objecting party must  
 13          demonstrate that the property is essential to a legitimate reorganization effort. This requires “not  
 14          merely a showing that if there is conceivably to be an effective reorganization, this property will  
 15          be needed for it; but that the property is essential for an effective reorganization *that is in*  
 16          *prospect.*” *United Sav. Ass’n v. Timbers of Inwood Forest Assocs., Ltd.*, 484 U.S. 365, 375-76  
 17          (1988) (italics in original). This means that there must be a “reasonable possibility of a successful  
 18          reorganization within a reasonable time.” *Id.* at 376.

19          There is nothing “necessary” or “effective” about the proposed reorganization outlined by  
 20          the Second Lien Group. Their proposed plan does nothing more than provide themselves with  
 21          the exclusive opportunity to invest a small sum from which they hope to reap a huge return.  
 22          Their investment has no productive value and is not necessary to “reorganize” the Debtor.  
 23          Consummation of their proposal will have no beneficial impact on the estate, and, if anything,  
 24          will result in a highly leveraged Property that will be managed in identical fashion as would be  
 25          26  
 27

the case after a foreclosure. The Property is not being preserved because it is essential to a reorganization nor has the plan been proposed to broaden the assets available for distribution to other creditors. The plan is intended only to allow the Second Lien Group to make a buck. The cram down provisions of the Bankruptcy Code were never intended to give out-of-the-money creditors long-dated "options" on future appreciation at the expense of senior secured lenders.

A. The Stay Must Be Lifted Where A Junior Lender is The Primary Beneficiary Of a Proposed Cram Down Plan

The automatic stay must be lifted when the debtor has no remaining economic stake in the property and where the real beneficiary of maintaining the stay would be a junior lender. The Court of Appeals for this Circuit clarified this over twenty years ago in a ruling that disposes of any opposition to the First Lien Lenders' motion:

"[u]nless the debtor can demonstrate that the property is necessary to an effective reorganization, the property is of no value to him. ***Refusing to grant relief from the automatic stay under those circumstances would only promote the junior lienholders' interests over those of the senior lienholder.***"<sup>16</sup>

*Stewart v. Gurley*, 745 F.2d 1194, 1196 (9th Cir. 1984) (emphasis added). This case cannot be continued for the benefit of the junior Second Lien Lenders over the objection of a senior secured lender who desires to foreclose. Cram down plans that shift the risk of success of the plan to a secured lender also should not be confirmed. *In re Gramercy Twin Assocs.*, 187 B.R. 112 (S.D.N.Y. 1995) (high loan-to-value ratio shifts risk to secured creditor and makes plan unconfirmable); *In re Monarch Beach Venture, Ltd.*, 166 B.R. 428, 428 (C.D. Cal. 1993)(shifting

<sup>16</sup> The Objecting Parties cannot avoid the binding nature and import of this established precedent merely by offering up to the Debtor's former equity holders a token "hope note" which they themselves have testified will likely never be in-the-money. June 11 Hr'g Tr. at 76 (Mr. Glasgow notes that the former equity holders of the Debtor are "being offered warrants which are way out of the money but understand that they're intended to be hope notes in the sense that if the value of this property six years from now is worth more than anyone could ever imagine, you know, then they'll be -- they'll be able to exercise those warrants and actually recoup some of their investment."). Nor does providing the Debtor the opportunity to invest in their scheme to divert value from the First Lien Lenders save their plan.

1 of risk to secured creditor makes plan unfair and inequitable); *In re DeTienne*, 2005 Bankr.  
 2 LEXIS 3122, at \*20 (citing *In re Manion*, 127 B.R. 887, 890 (Bankr. N.D. Fla. 1991)) (cram  
 3 down plan is inappropriate when it shifts the risk to the creditor such that the proposed plan  
 4 “essentially speculat[es] with the lender’s interest in the assets.”). But this is precisely what the  
 5 Second Lien Group is attempting.

7 The structure proposed by the Second Lien Group is not permitted. In *In re California*  
 8 *Hancock, Inc.*, 88 B.R. 226 (9th Cir. B.A.P. 1988), the Bankruptcy Appellate Panel of the Ninth  
 9 Circuit affirmed stay relief after consideration of a preliminary plan proposal from an out-of-the-  
 10 money debtor who was attempting to prevent foreclosure. The debtor had proposed a transaction  
 11 that was designed to ensure it would enjoy the benefits of any sale or future appreciation in value  
 12 of an apartment complex. *Id.* at 227. The debtor proposed to provided its secured creditor with  
 13 only a secured claim pegged to the appraised value of the property. The B.A.P. rejected the plan  
 14 and affirmed lifting of the stay, holding that the secured lender was “**entitled to all the**  
 15 **consideration from the transfer of the property which included any interest in ‘future**  
 16 **profits’**” *Id.* at 227 (italics in original).

18 The First Lien Lenders have an undersecured claim and a lien on all assets of this estate,  
 19 so they must receive the entire value of all estate property. The First Lien Lenders are aware of  
 20 no case in this Circuit in which an undersecured senior lender holding a lien on all of the debtor’s  
 21 property has been crammed down if the creditor had a preference to foreclose upon, purchase, or  
 22 acquire the equity in the property.<sup>17</sup> Even if a cram down plan was theoretically possible, the

25 <sup>17</sup> The majority of the relatively few published cases in this Circuit confirming a cram down pursuant to  
 26 1129(b)(2)(A)(i) involve *oversecured* creditors who retain secured notes in principal amounts equal to their  
 27 prepetition debt and who are thus protected from any valuation errors with respect to their collateral. This  
 28 is a radically different situation than the present case where the Second Lien Group’s plan proposes to cram  
 down an *undersecured* senior lender by saddling the First Lien Lenders with a note valued far below the  
 amount of their prepetition debt. See, e.g., *In re Boulders on the River, Inc.*, 164 B.R. 99 (9th Cir. B.A.P.

secured lenders still must receive either the sale proceeds, the indubitable equivalent of their claim, or cash and liens of a value equal to their claim. 11 U.S.C. § 1129(b)(2)(A)(i-iii). In each case, that is the entire value of the estate. *See In re Ambanc*, 115 F.3d at 653 (holding that each of the three cram down prongs under 1129(b)(2)(A) prevented a secured creditor from being crammed down unless it received the entire present value of the collateral securing its claim). The possibility of cram down does not create a right for stakeholders with no economic interest in the Debtor's property to receive a distribution under a plan where no value remains for them.

It is puzzling how the Objecting Parties can argue that there is value to be "preserved" for other constituents in this case. *See Debtor's Lift Stay Opposition* at 30-31. Even a cram down plan cannot preserve value for out-of-the-money constituents. They cannot strip a secured lender's collateral of future appreciation in value unless the undersecured creditor is paid in full or unless the secured creditor recovers equal consideration for what has been taken from them. Otherwise, a secured lender is not receiving the full value of its collateral.<sup>18</sup> The fact that the

---

1994) (Oversecured senior creditor received under a cram down plan a secured note with face value equal to its prepetition indebtedness, bearing 9% interest and which required periodic amortizations); *In re Sagewood Manor Associates Limited Partnership*, 233 B.R. 756 (Bankr. D. Nev. 1998) (cram down permitted where prepetition senior debt was approximately 80% of collateral value); *See also In re Orchards Village Investments, LLC*, 2010 WL 143706 (Bankr. D. Ore. 2010) (cram down plan found not "fair and equitable" because restructured loan required secured lenders to bear the risk that the debtor's operations would improve in the future or that refinancing would be available in the future; court acknowledged that if it were to overrule the cram down objections "I would be permitting the TIC Investors to speculate on an uncertain future lending environment not only with their funds, but with [the secured lenders'] money as well"); *In re Tri-Growth Centre City, Ltd.*, 136 B.R. 848 (Bankr. S.D. Cal. 1992) (stay lifted where debtor's proposed cram down plan was "defective on its face" because it attempted to restructure a loan to have an initial loan to value ratio of 100% and which "shift[ed] the risks associated with a declining motel business on a secured creditor who did not bargain for those risks when it initially lent the funds"); . The only case providing any apparent support for the Objecting Parties' view is *In re Weinstein*, 227 B.R. 284 (9th Cir. B.A.P. 1998). In that case individual chapter 11 debtors successfully crammed down an undersecured mortgage lender with a restructured note secured by the debtors' home. Such modifications of residential mortgages were subsequently prohibited by amendments to section 1123(b)(5). Leaving aside the legislative nullification of this option, this case is an outlier, inconsistent with other cases, and was decided on facts radically different than those here.

<sup>18</sup> Courts considering whether to lift the stay are called on to consider "the balance of the hardships between the parties and whether the creditor's property interest is being unduly jeopardized" *Rocco*, 2006 U.S. Dist. LEXIS at \*10; *In re Olick*, 221 B.R. 145, 161 (Bankr. E.D. Pa. 1998) (same). Here, the balancing is easy.

1 Second Lien Group openly admits that its plan is designed to “preserve” value for out-of-the-  
 2 money investors is an admission that they hope to game the system and benefit from a new  
 3 capital structure forced upon the First Lien Lenders. The Court should lift the stay to prevent the  
 4 Second Lien Group from pursuing such a windfall.

5 The requirements of section 1129(b)(2)(A) are not a cram down plan’s only prerequisites.  
 6 Such a plan must also be “fair and equitable” in the literal sense of those words. *In re Pacific*  
 7 *Lumber Co.*, 584 F.3d 229, 245-256 (5th Cir. 2009) (“[e]ven a plan compliant with these  
 8 alternative minimum standards is not necessarily fair and equitable.”); *In re Sandy Ridge Dev.*  
 9 *Corp.*, 881 F.2d 1346, 1352 (5th Cir. 1989) (“the bankruptcy court ‘must consider the particular  
 10 plan in the context of . . . the particular facts and circumstances [of the case]’ . . . simple  
 11 technical compliance with the requirements of section 1129(b)(2) does not assure that the plan is  
 12 fair and equitable) (quoting *In re D&F Constr. Co.*, 865 F.2d 673, 676 (5th Cir. 1989)). To  
 13 allow the out-of-the-money Second Lien Group to invert the capital structure after having  
 14 bargained for exactly the opposite result under an Intercreditor Agreement, and to acquire all of  
 15 the Debtor’s equity for a minimal cash payment and a note of dubious value, would not be fair  
 16 and equitable under any circumstances. This is all the more true where the senior secured  
 17 creditor prefers to retain the collateral and where no reorganization purpose would be furthered  
 18 by allowing cram down.

19  
 20  
 21  
 22 B. The Stay Must Be Lifted Because The Second Lien Lenders’ Plan Is Patently  
 23 Unconfirmable

24 The Second Lien Group’s plan proposal suffers from other glaring confirmation defects.  
 25 While courts recognize that a plan proponent need not establish each and every confirmation  
 26

---

27 If the stay is not lifted, the First Lien Lenders bear serious risk of an imperfect valuation or that the plan  
 28 will fail. But the only interest to be protected if the stay is left in place is the opportunity for the Second  
 Lien Group to make an investment that will *net them \$0*.

1 standard to the same level they would at a confirmation hearing, deficiencies or purely legal  
 2 issues which render confirmation impossible or improbable provide a basis for lifting the stay.  
 3 *California Hancock*, 88 B.R. 226, 231 (stay lifted where cram down proposal provided  
 4 out-of-the-money investor with all rights to future appreciation in a manner that violated  
 5 section 1129(b) and denied the creditor the right to credit bid); *Sun Valley Ranches*, 823 F.2d at  
 6 1376 (the stay is properly lifted in cases where declining value of real property provides reason  
 7 to believe that a reorganization cannot be achieved, even where parties “understandably  
 8 disagree” over whether a reasonable possibility of reorganization exists). The Ninth Circuit  
 9 requires a plan proponent, to avoid lifting of the stay, to demonstrate “feasibility of  
 10 confirmation” before the trial court and to “produce some evidence that its plan could be  
 11 confirmed by a reasonable bankruptcy judge”). *In re Bonner Mall P’ship*, 2 F.3d 899, 902 n.4  
 12 (9th Cir. 1993). In that case the Ninth Circuit instructed the trial court to evaluate confirmation  
 13 objections when considering whether to lift the stay. *Id.* at 905. The Objecting Parties must  
 14 provide clear proposals and evidence regarding their purported plans of reorganization. *In re*  
 15 *Kurth Ranch*, 97 B.R. 33, 36 (Bankr. D. Mont. 1989) (lifting the stay where no plan had been  
 16 proposed and where the absence of testimony on a confirmable plan provided no grounds for  
 17 finding an effective reorganization in prospect “on the basis of the present record”). The  
 18 Objecting Parties cannot meet this burden.

19  
 20  
 21  
 22 1. *The Proposed Interest Rate Is Too Low to Compensate for the Risk of the*  
 23 *Proposed Loan, and Other Terms Are Insufficient to Protect the First Lien*  
 24 *Lenders*

25 In *Till v. SCS Credit Corp.*, 541 U.S. 465 (2004), the Supreme Court determined that in a  
 26 chapter 13 case, the cram down interest rate is the national prime rate plus a risk factor based on  
 27 the creditworthiness of the debtor. *Till* left open the possibility that a market rate might be more  
 28 appropriate in a chapter 11 context, *id.* at 477 n.14, and the Ninth Circuit has not ruled on that

1 issue. But there is no reason to believe that the 5.5% interest rate the Second Lien Group has  
2 offered would pass muster under any method for the calculation of a cram down interest rate.

3 There is an efficient market for large commercial real estate loans in this country, but no  
4 bank would ever extend the loan being proposed by the Second Lien Group at a 5.5% rate (or a  
5 rate even close to this amount). Manley Declaration, ¶¶ 17-18. The reorganized borrower would  
6 be highly leveraged and have no commitments for future equity infusions; instead, it would have  
7 to pay high equity returns. With only the most marginal of equity cushions and cash flows which  
8 are barely sufficient (at best) to service the debt, the restructured loan exposes the First Lien  
9 Lenders to severe risk of loss of principal and would demand a high interest rate in return.  
10 Manley Declaration, ¶¶ 26-29. A plan predicated on an unstable rental income stream in a  
11 volatile real estate market has dubious confirmation prospects. *In re Landry*, 1994 U.S. App.  
12 LEXIS 1559, \*13 n.5 (9th Cir. 1994) (stay lifted in case where “property values and rents were  
13 declining in the area” making debtor’s income “subject to fluctuation” such that a proposed cram  
14 down plan was too uncertain to be confirmable). The commercial real estate loan market also  
15 would never value at par a loan at the debt-to-value ratio proposed by the Second Lien Group,  
16 especially one without standard lender protections such as limits on returns to equity holders, bad  
17 boy guaranties, and a reasonable package of financial and restrictive covenants. Manley  
18 Declaration, ¶ 14. The Ninth Circuit B.A.P. has approved a plan that provided for a loan-to-  
19 value ratio higher than prevailing market ratios (as is the case here), only where an above-market  
20 interest rate was paid in return. *In re Boulders on the River*, 164 B.R. 99, 104-06 (B.A.P. 9th  
21 Cir. 1994).

22 The Second Lien Group’s plan is a classic “heads-we-win, tails-you-lose” proposal. If  
23 the Property appreciates, then they keep everything (having paid almost nothing); if the Property  
24

declines, or does not appreciate quickly enough, then the plan fails, and the First Lien Lenders will not receive even the depressed value of their collateral. In the meantime, the Second Lien Group will hope that they have recouped their own investment with a handsome return of 20% prior to any such default. This is precisely the type of risk shifting that applicable case law forbids. *See In re Manion*, 127 B.R. 887, 890 (Bankr. N.D. Fla. 1991) (plan was not fair and equitable because it was unclear whether the property would be able to maintain its current value and proponent was speculating with the creditors' money).<sup>19</sup>

The availability of a section 1111(b) election does not cure this defect. A lender is not compelled to make a section 1111(b) election. More importantly, even if a section 1111(b) election was made, the First Lien Lenders would still be at risk because the amortization payments that the Property can support would not reduce the principal amount of the loan quickly enough to ensure repayment of the principal and the exit fees at maturity. Manley Declaration, ¶44. The First Lien Lenders would be forced to bear considerable risk that the Property may not appreciate. Fine Declaration, ¶ 14.

<sup>19</sup> *In re Orchard Village Invs., LLC*, 2010 Bankr. LEXIS 48 (Bankr. D. Or. 2010) is also instructive. There the court declined to confirm a plan that would pay a secured claim at below market interest over seven years with a substantial balloon payment due at the end of seven years. Drawing on expert evidence, the court concluded that it was unclear the debtor would be able to refinance at the end of seven years. *Id.* at \*52-53. In making its decision, the court weighed expert testimony which indicated that the market for obtaining financing at an affordable rate was tight, and that even the lowest rate at which refinancing could be available was higher than the 5% interest the secured creditor would be paid under the cram down plan. *Id.* at \*55-56. Plans that do not provide for amortization require balloon payments at the end and may be held unconfirmable for this reason. *Miami Center Associates*, 144 B.R. 937, 942 (Bankr. S.D. Fla. 1992) (market conditions and contingent nature of the plan shifted the risk to the creditor making it "questionable" whether the creditor would receive the value of its total secured claim). This defect in the Second Lien Group's proposal is only made more offensive when one considers the amount of free cash flow they propose to divert from the Property irrespective of whether the value of the Property is likely to support repayment at maturity and irrespective of whether the loan is in default.

1 In addition, loans with lengthy maturities at odds with industry standards are routinely  
 2 rejected under Bankruptcy Code section 1129(b).<sup>20</sup> The existing loan has already matured, but  
 3 the Second Lien lenders want to force the First Lien Lenders to wait another nine years to see if  
 4 they can recover even the now depressed value of their loan. This does not satisfy Bankruptcy  
 5 Code section 1129(b)(2)(A). An appropriate term for a loan such as this would be 1-3 years.  
 6  
 7 Manley Declaration, ¶33.

8 2. *The Proposed Plan Does Not Provide the Senior Lenders an Opportunity to*  
 9 *Credit Bid or to Match the Bid Made by the Second Lien Lenders*

10 A secured creditor cannot have its property sold without being provided a right to credit  
 11 bid. In *In re Monarch Beach Venture, Ltd.*, 166 B.R. 428 (D. C.D. Cal. 1993), the District Court  
 12 for the Central District of California noted the discretion granted to a bankruptcy court to decline  
 13 to allow credit bidding under section 363(k). The court surveyed case law in this Circuit and  
 14 concluded that “each of the six decisions that has addressed this issue held that the secured  
 15 creditor had a right to credit bid his entire claim.” *Monarch Beach*, 166 B.R. at 433. The Court  
 16 thus concluded that “at least in this Circuit, the right to credit bid may not be taken from the  
 17 creditor.” *Id.* Here, the only “cause” which the Second Lien Group is able to point to is their  
 18 own desire to effectuate a cram down plan over the objection of the First Lien Lenders or the  
 19

20  
 21 <sup>20</sup> See, e.g., *In re Miami Center Associates, Ltd.*, 144 B.R. 937, 940-41 (Bankr. S.D. Fla. 1992) (ten year term  
 22 of cram down note not fair and equitable because loans in the debtor’s industry usually were three to four  
 23 years in duration); *In re VIP Motor Lodge, Inc.*, 133 B.R. 41, 45 (Bankr. D. Del. 1991) (finding a hotel loan  
 24 for a thirty year term at ten percent interest rate too long because few hotel loans were being made and such  
 25 loans typically were available only with shorter terms”); *In re D&F Constr., Inc.*, 865 F.2d 673, 676 (5th  
 26 Cir. 1989) (holding that a fifteen year deferred payment period was too long); *In re 222 Liberty Assocs.*,  
 27 108 B.R. 971, 993-996 (Bankr. E.D. Pa. 1990) (determining that a ten year deferred payment period to be  
 28 too long)); *In re DeTienne Assocs. L.P.*, 2005 Bankr. LEXIS 3122 (Bankr. D. Mon. July 29, 2005) (lengthy  
 extension of loan term was not fair and equitable and “smacked of inequity”). Although lengthier cram  
 downs are not unknown, they are subject to heightened scrutiny and typically occur in contexts of  
 residential mortgages or where a substantial equity cushion provides more genuine security of eventual  
 repayment. See also *In re Orchard Village Invs., LLC.*, 2010 Bankr. LEXIS 48, at \*57-59 (Bankr. D. Or.  
 Jan. 8, 2010) (proposal to extend a matured, short-term loan over a substantially longer term is subject to  
 particularly close scrutiny (citing *In re Tri-Growth Centre City, Ltd.*, 136 B.R. 848, 852 (Bankr. S.D. Cal.  
 1992)); *In re Sagewood Manor Assocs., L.P.*, 223 B.R. 756, 770-71 (Bankr. D. Nev. 1998) (allowing cram  
 down plan, which extended the repayment time period but finding existence of an equity cushion).

1 alleged "conspiracy" pursuant to which the First Lien Lenders attempted to sell their collateral to  
2 the highest available bidder.

3 Perhaps most importantly, a plan designed to circumvent credit bidding by a secured  
4 lender would be unconfirmable in this Circuit. *California Hancock* makes clear that credit bid  
5 rights extend even to plan proposals that are not technically structured as sales, including plans  
6 proposed under sections 1129(b)(2)(A)(i) and 1129(b)(2)(A)(iii). *California Hancock*, 88 B.R.  
7 at 230-31. It is not surprising that the Second Lien Group attempts to direct this Court toward  
8 cases from other jurisdictions. But it is surprising that they cite *In re Philadelphia Newspapers*,  
9 LLC, 599 F.3d 298 (3d Cir. 2010) time after time. In that case, well known at first for the  
10 unsettling shadow it cast over the rights of secured lenders, the Third Circuit ultimately decided  
11 that there could be circumstances in which a sale pursuant to a plan could be structured without  
12 allowing secured creditors the right to credit bid. *Id.* at 304-10. But even as they did so, they  
13 called into serious question whether a secured creditor would, as a matter of fact, receive the full  
14 value of its collateral if denied the right to credit bid to prevent the disposition of its collateral at  
15 an unreasonably low price. *Id.* at 312. Furthermore, *Philadelphia Newspapers* only delayed the  
16 inevitable because the secured lenders in that case ultimately decided to bid cash at an auction  
17 for their collateral and thereby achieved the same result as a credit bid. *In re Philadelphia*  
18 *Newspapers, LLC*, Case No. 09-11204 (Bankr. E.D. Pa. 2010) [Docket No. 2253] (plan  
19 providing for acquisition by a group of secured lenders who had been denied the right to credit  
20 bid confirmed by order entered on June 29, 2010) (appeal by employee pension benefit plan on  
21 other grounds currently pending).

The Second Lien Group's plan is effectively a sale of the equity to the Second Lien Group for \$10 million and certain other value (*e.g.*, the value of certain reserves). But the Second Lien Group aims to immunize this sale from the strictures of any market testing. The mere fact that the Second Lien Group's plan is being presented in a case where exclusivity has been terminated does not mean that they can avoid proving that the price paid for any property of the estate is fair, reasonable, and on market terms. Only an auction could show this. The Second Lien Group, or the Debtor, must market test their proposal. Otherwise there is no reason to believe the proposed price they are paying is the best available price, especially when they see that investment earning 20%.

Plan voting and confirmation requirements might normally provide some protection to ensure that a below-market sale could not be approved. But that would not happen here because the voting will be determined by the Second Lien Group who will, of course, vote their claims in favor of the below-market sale. They also will curry favor with junior classes by offering them a share of the misappropriated value for blessing the deal with their votes. With the voting rigged, only a robust market test can provide any assurance that section 1129(b)(2)(A)(i) or 1129(b)(2)(A)(iii) has been satisfied. Absent such a test, there will be no evidence that the First Lien Lenders have received the full value of their collateral. Manley Declaration, ¶ 49.

23  
24  
25  
26  
27.

The plan proposed by the Second Lien Lenders contains a “waterfall” intended to govern the distribution of cash flow generated by the Property postpetition. The Second Lien Group has included in this waterfall a number of cash payments for their exclusive benefit. These payments are nothing more than *de facto* deferred distributions under the plan. The distributions in

question run afoul of the requirements that a plan not “discriminate unfairly,” that it be fair and equitable, and that any new value provided be of reasonably equivalent value to that which is taken in exchange. The proposed distributions include the repayment of a \$20 million proposed investment with a 20% return. This amount is payable regardless of whether the loan is in default. *See* Debtor’s term sheet, [Docket No. 297-1] at 4 (prong 10 of proposed “waterfall” does not terminate payments upon default). The Second Lien Group also proposes to receive distributions reimbursing them for their prepetition and postpetition legal fees. Because the payment of fees of an unsecured creditor is prohibited under section 506(b) of the Bankruptcy Code, the inclusion of such a provision violates section 1129(a)(1) and make the plan unconfirmable.

#### 5. *The Plan Cannot Satisfy the Best Interests of Creditors Test*

The Second Lien Lenders plan cannot satisfy the “best interests of creditors” test under Bankruptcy Code section 1129(a)(7) because the proposed distribution to the First Lien Lenders does not exceed what they would receive in a chapter 7 liquidation. Where assets can be sold quickly in a chapter 7 case on a going concern basis a hypothetical “fire sale” valuation is not the proper metric for judging whether the “best interests” standard is satisfied, and the court must instead look to the value that could be available from a going concern sale of the collateral. *In re Larson, Inc.*, 300 B.R. 227, 232-33 (Bankr. D. Del. 2003) (court noted that while “best interests of creditors” required a hypothetical chapter 7 liquidation analysis, chapter 7 authorizes trustee to operate the debtor’s business for a limited period for the purposes of realizing greater returns by selling the debtor’s business as a going concern).<sup>21</sup> Offers of not less than \$180 have been received for the Property, and interested parties continue to contact the First Lien Lenders.

<sup>21</sup> This reasoning is difficult to reject in a case where the debtor would almost certainly sell the entire Property at once and to a single buyer.

1 Bertsch Declaration, ¶ 16. If a buyer would pay \$180 million for the Property in liquidation, and  
 2 the First Lien Lenders were to receive a \$10 million cash paydown under the plan, they must also  
 3 receive a restructured debt obligation that is *worth* \$170 million. Thus, any debt obligation  
 4 which the First Lien Lenders could be forced to accept must trade at par and otherwise be on  
 5 market terms for the “best interests of creditors” test to be satisfied. As demonstrated in the  
 6 Manley Declaration, the value of the note on offer from the Second Lien Lenders comes nowhere  
 7 near par. Manley Declaration, ¶15.

9 Finally, the First Lien Lenders themselves likely are willing and able to purchase the  
 10 Property in a liquidation for a cash price in excess of the value being offered by the Second Lien  
 11 Group’s plan. On this basis alone the Second Lien Group’s plan is unconfirmable.

12  
 13 6. *The Plan Contemplates Impermissible “Gifts” To Manufacture A Vote From  
 An Impaired Class*

14 The Second Lien Group’s plan requires an accepting impaired class under  
 15 section 1129(a)(10) of the Bankruptcy Code. There is no value in this estate other than for the  
 16 First Lien Lenders, so nothing can be distributed under a plan to junior classes. Accordingly, all  
 17 such classes should be deemed to reject the plan under Bankruptcy Code section 1126(g). If the  
 18 First Lien Lenders vote against the plan, then there would be no accepting impaired class and the  
 19 plan could not be confirmed.  
 20

21 The plan proposes distributions to out-of-the-money stakeholders in order to gerrymander  
 22 an accepting impaired class. In addition to improperly classifying any First Lien Lender  
 23 deficiency claim separately from unsecured creditors that would be paid in full, the Second Lien  
 24 Group proposes to make a *de minimis* gift to the unsecured creditors (*i.e.*, primarily to  
 25 themselves) and to have such a gift treated as if it were a “distribution” of the Debtor’s property  
 26 (where in fact it is a distribution of a portion of the equity which the Second Lien Group  
 27

proposes to purchase from the estate). This gimmick is intended to avoid a deemed rejection by such class and allow the Second Lien Group to vote their worthless prepetition claim in favor of their own self-serving plan.

This is a clear effort to eviscerate the protections afforded by Bankruptcy Code sections 1129(a)(10) and 1126(g). Those sections combine to ensure that the hardships of a cram down are justified only where the cram down is needed to preserve value for a junior class that is *not* out-of-the-money. Treating what is in fact a “gift” as a “distribution” for the purpose of class voting would end run these Bankruptcy Code provisions and should not be permitted. *See In re Ambanc*, 115 F.3d at 656 (classification schemes which are designed “for the purpose of securing an impaired consenting class” have been found to be “improper.”). The creation of a separate convenience class is also a clear attempt at gerrymandering in this case.

7. *The Plan Violates the Absolute Priority Rule and Does Not Satisfy the “New Value” Plan Requirements*

The Second Lien Group’s plan, including its classification scheme, violates the absolute priority rule because junior creditors and equity holders receive value under the plan despite the fact that impaired, senior creditors will vote to reject the plan.<sup>22</sup> Furthermore, the Second Lien Group’s plan does not satisfy the so-called “new value corollary” to the absolute priority rule, as detailed by this Circuit in *In re Bonner Mall Partnership*, 2 F.3d 899 (9th Cir. 1993) and as described by the Supreme Court in *Bank of America National Savings Assoc. v. 203 N. LaSalle*

<sup>22</sup> The First Lien Lenders will vote to reject the Second Lien Lenders’ plan. If they do not make a §1111(b) election they must be separately classified and will vote to reject in their capacity as unsecured creditors, triggering a violation of the absolute priority rule. In fact, the structure of the Second Lien Group’s plan is so similar to the type of manipulative new value plan that motivated the Supreme Court to endorse the heightened level of scrutiny required under the *LaSalle* factors, that the *LaSalle* factors should be applied by this Court to the proposed Second Lien Group plan irrespective of whether the First Lien Lenders make a § 1111(b) election or whether the Court holds that the absolute priority rule applies in the case of a secured creditor who will not be paid in full. The factors should be applied as part of the Court’s “fair and equitable” analysis.

1 *St. Partnership*, 526 U.S. 434 (1999). At the outset, it should be noted that the Debtor's equity  
2 holders are receiving a distribution without making any corresponding contribution. This is a  
3 *per se* violation of the absolute priority rule.

4 The Second Lien Group offers to provide the estate with \$10 million to fund  
5 distributions. This amount represents a mere 2% or so of the outstanding claims. The Ninth  
6 Circuit has noted that contributions constituting 3.8%, 2.2%, and 1.56% have been found to be  
7 insubstantial. *In re Ambanc*, 115 F.3d at 655-56. The contribution offered by the Second Lien  
8 Group clearly falls within this range of *de minimis* contributions and does not constitute  
9 sufficient new value.  
10

11 More importantly, the "value" proposed in the Second Lien Lender Plan is not necessary  
12 for a successful reorganization. The use of "new value" to pay additional senior claims is not  
13 sufficient to prove necessity. *In re Tucson Self-Storage, Inc.*, 166 B.R. 892, 873 (9th Cir. BAP  
14 1994). The value provided to the bankruptcy estate through the Second Lien Group's plan does  
15 not assist in the successful reorganization of the debtor because no new money is needed. The  
16 cash flow of the Property is positive and no funding needs have gone unsatisfied. In fact, the  
17 money to be provided is required under the plan only because the plan itself creates such a highly  
18 leveraged property. Foreclosure accomplishes greater deleveraging without the need for  
19 additional funds. The necessity test is designed to prevent precisely the type of plan proposed by  
20 the Second Lien Group: one which provides new money, where none is needed, in the hope of  
21 subverting a debtor's capital structure even though there is an impaired senior creditor who  
22 should receive the equity in the debtor because their claim cannot be satisfied.  
23  
24

25 It is also clear that the value provided by the Second Lien Group's Plan is not  
26 "reasonably equivalent" to the interest that the investing Second Lien Group will receive. While  
27

1 the Second Lien Group's plan provides only \$10-20 million in new value, it allows the investing  
 2 Second Lien Group and the Debtor's equity holders to enjoy nearly the entire amount of any  
 3 "future profits" from the property. They also benefit from any appreciation in the Property's  
 4 value over time. The proposed waterfall allows them to repay their own investment from free  
 5 cash flow, meaning that they could in effect be acquiring an option on all future profit or  
 6 appreciation for free. If the Second Lien Lenders were to attempt to purchase the entire rights to  
 7 the future profits and appreciation of similarly situated property in return for a paydown of a  
 8 mere \$10 million, they likely would not be able to find a seller.

10 Finally, the Second Lien Group also cannot satisfy the requirement that their plan be  
 11 market tested. *See Bank of America National Savings Assoc. v. 203 N. LaSalle St. Partnership*,  
 12 526 U.S. 434, 458 (1999) (stating that "plans providing junior interest holders with exclusive  
 13 opportunities free from competition and without benefit of market valuation fall within the  
 14 prohibition of §1129(b)(2)(B)(ii)."). Here, both the Debtor and the Second Lien Group have  
 15 failed to test the market to determine the sufficiency of their terms and they appear to have no  
 16 plan to do so. Exclusivity has been terminated to allow competing plans, but the Second Lien  
 17 Group argues that the First Lien Lenders cannot bid in this process. To be confirmable, the  
 18 Objecting Parties must either market test *their* proposed structure (*i.e.*, market test what someone  
 19 would pay for the equity they propose to acquire) or the First Lien Lenders must be permitted to  
 20 buy the equity themselves in any such process (for cash or credit).

#### 23 8. *The Plan Is Not Feasible*

24 The Second Lien Group's plan is not feasible, as section 1129(a)(11) of the Bankruptcy  
 25 Code requires, because it is likely to require further reorganization or liquidation in the future.  
 26 *See In re Pizza of Hawaii, Inc.*, 761 F.2d 1374, 1382 (9th Cir. 1985); *see also In re Trans Max*  
 27 *Tech., Inc.*, 349 B.R. 80, 91 (Bankr. D. Nev. 2006). The Debtor, who opposes the Liftstay

1 Motion, has nonetheless noted that the cash flow from the Property likely is not sufficient to  
 2 satisfy the proposed interest payments on the new loan but argues that the \$8 million interest  
 3 reserve will be sufficient to make the plan feasible. The term sheet for the Second Lien Lender's  
 4 plan, though, states that the First Lien Lenders would receive 5.5% in amortization payments  
 5 should they make an 1111(b) election. Even at the misstated claim amount of \$259 million, and  
 6 after giving effect to the proposed \$10 million paydown, these amortization payments would  
 7 exceed \$28 million in the first two years. Manley Declaration, ¶ 44.<sup>23</sup> That would use up  
 8 substantially all of the cash flow from the Property and eat up the entire interest reserve with a  
 9 default triggered within the second year of the loan. While that alone creates a high probability  
 10 of default, the Debtor's analysis also ignores the additional risks of declining revenues in an  
 11 unstable market in which tenants of the Property have been demanding rent concessions. Fine  
 12 Declaration, ¶ 16H and Bertsch Declaration, ¶ 10. The feasibility of the plan cannot be saved  
 13 merely by reducing the amortization payments to be received by the First Lien Lenders because  
 14 that, in turn, would create the risk that the Property would not appreciate quickly enough to  
 15 support repayment of the restructured loan and any applicable exit fees. Manley Declaration,  
 16 ¶44. Further, even if the First Lien Lenders do not make a § 1111(b) election, feasibility cannot  
 17 be established unless the Court approves a cram down interest rate of 5.5% or less, which is far  
 18 below a market rate of interest or a rate reasonable to compensate the First Lien Lenders for risk  
 19 assumed. Manley Declaration, ¶ 17. Even then, there must be no decline in revenues. The plan  
 20 simply will not satisfy section 1129(a)(10) of the Bankruptcy Code.

1                                    9. *The Plan Has Not Been Proposed In Good Faith*

2                    Section 1129(a)(3) of the Bankruptcy Code requires that “a reasonable likelihood that the  
3 plan will achieve a result consistent with the objectives and purposes of the Bankruptcy Code.”  
4 *In re Madison Hotel Assocs.*, 749 F.2d 410, 415 (7th Cir. 1984); *see also Bonner Mall*, 2 F.3d  
5 899. The Second Lien Group’s plan fails this test. In *Bonner Mall* the Ninth Circuit noted that  
6 the two objectives of the Bankruptcy Code were: (i) to permit successful rehabilitation of  
7 debtors and (ii) to maximize the value of the estate. *Bonner Mall*, 2 F.3d at 915. The Second  
8 Lien Group plan has been proposed not to preserve value that would otherwise be lost or to  
9 enhance value for creditors. Nor does the plan do anything to rehabilitate the Debtor. The Court  
10 has queried whether there *is* a Debtor to speak of in this case.<sup>24</sup> The Second Lien Group’s plan  
11 has been proposed in the hopes of diverting value from the First Lien Lenders and preserving it  
12 for out-of-the-money stakeholders, who while arguing that they are providing fair and full value  
13 to the estate’s only in-the-money creditors, are in fact gambling that they can siphon back their  
14 original investment and enjoy all future appreciation in value for themselves while requiring the  
15 First Lien Lenders to bear all losses. To achieve this effect, the proposed plan leaves the  
16 property leveraged at close to 100% of its value, ensuring a subsequent bankruptcy if the gaming  
17 and real estate markets do not rebound. All of this directly contradicts the Intercreditor  
18 Agreement. Such a plan cannot be said to have been proposed in good faith under the applicable  
19 legal standard in this jurisdiction.

20                                    10. *The Second Lien Group Will Cast its Votes to Approve a Self-Serving*  
21                                    *Acquisition and Such Votes Should Be Designated*

22                    The votes of the Second Lien Group should be designated rather than being counted toward the  
23 acceptance of their own self-dealing plan. It is clear that on their own plan proposal  
24  
25  
26  
27

28                    <sup>24</sup> June 11 Hr’g Tr. at 140-41.

the Second Lien Group will be wearing “two hats”. They will be treated as both “Investing Second Lien Lenders”, in which capacity they propose to acquire a substantial majority of the equity in the Property, and they will be an unsecured creditor as well, purportedly voting their claim as an independent and objective creditor. But when they vote to approve the plan in their capacity as an “unsecured creditor” they will in fact be voting to accept their own plan because it serves their interests in their capacity as acquirer of equity in the Property. There will be no objectivity or independence to any such vote and the situation falls well within the scope of cases in which a creditor’s vote should be “designated” in order to protect the integrity of the chapter 11 plan approval process. *See In re Figter Ltd.*, 118 F.3d 635, 639 (9th Cir. 1997) (noting that in determining whether votes were not made in good faith “[i]t is always necessary to keep in mind the difference between a creditor’s self interest as a creditor and a motive which is ulterior to the purpose of protecting a creditor’s interest.”); *In re Landing Assocs., Ltd.*, 157 B.R. 791, 803 (Bankr. W.D. Tex. 1993) (noting that “[t]he mere pursuit of economic gain does not, of itself, indicate bad faith, so long as the interest being served is that of the creditor as creditor, as opposed to the creditor in some other capacity.”) (emphasis in original); *In re Federal Support Co.*, 859 F.2d 17, 19 (4th Cir. 1988) (stating that “[o]ne who casts his vote with a purpose of coercing payment to him of more than he might reasonably perceive as his fair share of the debtor’s estate, does not cast his vote in good faith.”).

Section 1129(a)(10) of the Bankruptcy Code expressly provides that the votes of insiders are not to be counted. This reflects a choice on the part of Congress to not allow the votes of plan proponents when considering whether an impaired class has voted to accept the plan. With exclusivity having been terminated, the Second Lien Group stands in the shoes of the “Debtor”

1 for purposes of their own plan, and their own, self-serving votes should be treated as those of an  
2 “insider” and not be counted.

3 C. The Intercreditor Agreement Prohibits the Second Lien Group Plan

4 Last but not least, the Second Lien Group cannot confirm their plan unless and until they  
5 prevail in the adversary proceeding regarding the Intercreditor Agreement. To do so, the Second  
6 Lien Group must establish, *inter alia*, that: (i) the previously proposed LIRA transaction was a  
7 prohibited refinancing within the meaning of the Intercreditor Agreement; (ii) such prohibition  
8 on refinancings applied even after maturity of the original loan; (iii) such prohibition on  
9 refinancings were not overridden by the clear terms of the contract which allowed the First Lien  
10 Lenders full discretion in the disposition of the Property after any default; (iv) that the Second  
11 Lien Group did not breach the Intercreditor Agreement prior to any alleged breach by the First  
12 Lien Lenders; (v) that the mere contemplation and pursuit of the LIRA transaction constituted a  
13 breach of the Intercreditor Agreement even though such transaction was never actually  
14 consummated; and (vi) that the remedy of treating the contract as terminated was available and  
15 appropriate under the circumstances and that the Second Lien Group was not required to elect an  
16 alternative remedy under applicable law or the terms of the contract itself. Absent successfully  
17 establishing each of the above points (in addition to rebutting any other arguments raised by the  
18 First Lien Lenders), the Second Lien Group plan cannot be confirmed.

19 As detailed above, the Second Lien Group’s Plan suffers from at least a dozen separate  
20 sets of confirmation problems. Most of these defects violate settled case law in this Circuit.  
21 Thus, to succeed in confirming their plan, the Second Lien Group must persuade both this Court,  
22 and any appellate courts, that *each* of the above described deficiencies should not prohibit  
23 confirmation. If they fail to rebut even a single argument, then their plan cannot be confirmed.  
24 Against these odds, there is no reasonable basis for concluding that there is a “reasonable  
25  
26  
27  
28

1 likelihood” of confirming a plan within a reasonable period of time. Accordingly, there is no  
2 reason that this case should continue over the objection of the secured lenders, who stand ready  
3 and able to achieve a substantially identical or superior reorganization of the property that will  
4 return it to a more productive use on a quicker timeframe and with greater certainty and less  
5 expense.

#### 6 **IV. Conclusion**

7  
8 The Objecting Parties are asking for a radical reorientation of the rights and priorities of  
9 secured lenders vis-à-vis out-of-the-money stakeholders. On the Second Lien Group’s novel  
10 theory of the law, a secured lender could always be prevented from realizing the full value of its  
11 collateral if a handful of creditors can force a bankruptcy and then assert that they desire to  
12 purchase the equity or assets of the debtor for minimal consideration. The Objecting Parties  
13 insist a secured lender must fund such a process with its own cash collateral and can be forced to  
14 endure actual and threatened deterioration in the value of their collateral in a highly volatile and  
15 unsettled real estate market.

16  
17 An undersecured lender’s “forced lending obligations” do not end here according to the  
18 Objecting Parties. They extend beyond bankruptcy as well. The Second Lien Group insists that  
19 even where a secured lender is the only entity with any economic interest in the property, such a  
20 lender can be compelled to sell its collateral to an out-of-the-money stakeholder and to finance  
21 such a purchase with a loan of almost a decade (even after a prior loan has matured and gone  
22 unpaid). Under this theory of the law, the First Lien Lenders could have over one-  
23 hundred million dollars of their investment eliminated while the dissenting creditors keep for  
24 themselves the value of any future recovery in the real estate market. The dissenting creditor is  
25 allegedly entitled to this value for a price of its own choosing because the Objecting Parties  
26  
27

1 argue that the secured lender cannot block such a proposal with their own bid, be it a bid of cash  
2 or credit. In fact, no other party will be permitted to bid.

3 The Second Lien Group will, no doubt, argue that the confirmation and voting  
4 requirements of the Bankruptcy Code provide sufficient protection for the senior lenders. But  
5 here, the only votes other than the self-serving votes of the Second Lien Group members will be  
6 the votes that they "buy" by sharing the value that they plan to divert from the senior lenders.  
7 The Second Lien Group argues that the subordinated junior lenders (who enjoyed greater returns  
8 in exchange for willingly accepting greater risk) must have the right to trump the preferences of  
9 the senior lenders (who accepted lower returns but bargained for greater protection). This would  
10 flip the comparative rights of the two groups on their head. Such a disturbing new precedent  
11 could make worthless shares and loans the new "fulcrum security" and investment of choice for  
12 distressed investors. This would have jarring effects in any case involving a proposed  
13 foreclosure. Even a small stake of worthless equity or credit, acquired for pennies on the dollar,  
14 could allow distressed investors to halt foreclosures and engage in opportunistic bankruptcy  
15 cases with the aim of realizing outsized returns based on nothing other than the inevitability of  
16 errors in valuation and the hope of a future appreciation in the real estate market. Such cases  
17 would be encouraged notwithstanding the absence of any legitimate reorganizational purpose or  
18 economic value and would upset long held investor expectations that are underpinned by the  
19 protections of the Bankruptcy Code and settled appellate level authority in this Circuit.

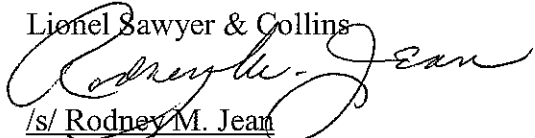

20  
21  
22  
23 Against this novel and legally unsupported new theory, the First Lien Lenders ask this  
24 Court to honor a centuries old legal principle and to find that a secured mortgagee who has not  
25 been repaid at the maturity of its loan be allowed to foreclose. In a case where the property  
26 securing the loan has no role to play in a larger reorganization and where no value remains for  
27 out-of-the-money creditors a cram down plan is not viable. There is no reason foreclosure

1 should be prohibited. On the facts of this case, both equity and the Bankruptcy Code demand  
2 that the stay be lifted.

3 For all of the above reasons, the First Lien Agent respectfully requests that this Court  
4 grant this Liftstay Motion and enter an order for the relief requested herein.

5 WHEREFORE, the First Lien Agent respectfully requests that this Court (i) enter an  
6 order granting the Liftstay Motion and (ii) grant such other and further relief as is just and  
7 proper.
